

Voya Senior Design Team Contract

Team Members: Tessneem Khalil, Salwa Syed

1. Project Overview

Voya is a peer-sourced trip-planning platform that consolidates weather, mapping, and pricing data (currently scattered across separate sites and spreadsheets) into shareable, budget-transparent itineraries. The project targets college-age and young-professional travelers who are underserved by platforms that assume disposable income. Voya is built by a two-person student team over two semesters, using free-tier APIs for weather, mapping, and pricing data.

2. Advisor

Our advisor has agreed to serve for the full two-semester project, to meet with the team at least every two weeks, to validate project scope and design decisions, and to submit the Project Advisor Assessment at the end of the year.

Name	<i>Dr. Jillian Aurisano</i>
Department	<i>Computer Science</i>
Email	<i>aurisajm@ucmail.uc.edu</i>
Fit rationale	<i>Data visualization and human-computer interaction</i>

3. Roles & Responsibilities

- Both members share responsibility for design decisions, build decisions, and advisor communication.

4. Communication & Meetings

- Team check-in: twice weekly via in person/messages
- Advisor meeting: at least once every two weeks, per the assignment requirement.
- Response expectation: messages related to deadlines are acknowledged within 24 hours.

5. Decision Making & Work Standards

- Design decisions affecting project scope are discussed by both members before implementation.
- Each member is expected to complete assigned work by the agreed deadline or flag a delay at least 48 hours in advance.
- Code, documents, and assets are version-controlled and committed with descriptive messages.

6. Conflict Resolution

Disagreements on technical or scope decisions are first discussed directly between team members. If unresolved, the advisor is asked to weigh in at the next scheduled meeting.

7. Approval

By signing below, the team and advisor confirm agreement with this contract.
